## How to Production

05

**EPE Foam Cutting Machine**

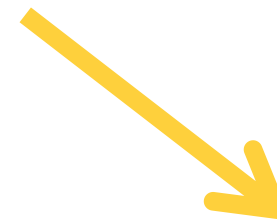

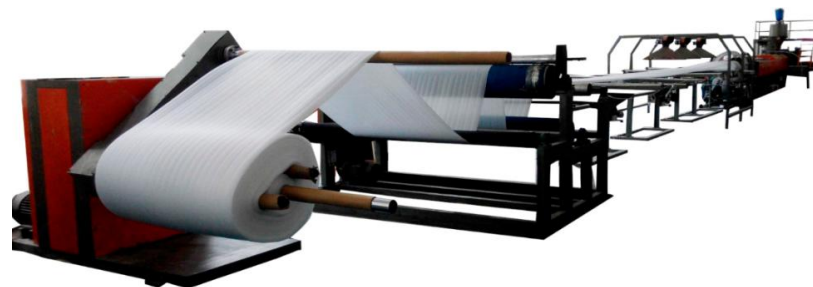

**EPE Foam Recycling Machine**

# EPE Foam Extrusion Machine

Through EPE Foam Extrusion Machine, will get the epe foam roll as images shown.

# EPE Foam Raw Materials

LDPE(New) + Recycled materials + GMS + Butane + Talcum Powder

LDPE

Talcum Powder:  
1‰~10‰

GMS: 12-35kg/T

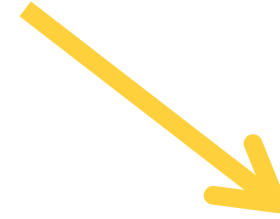

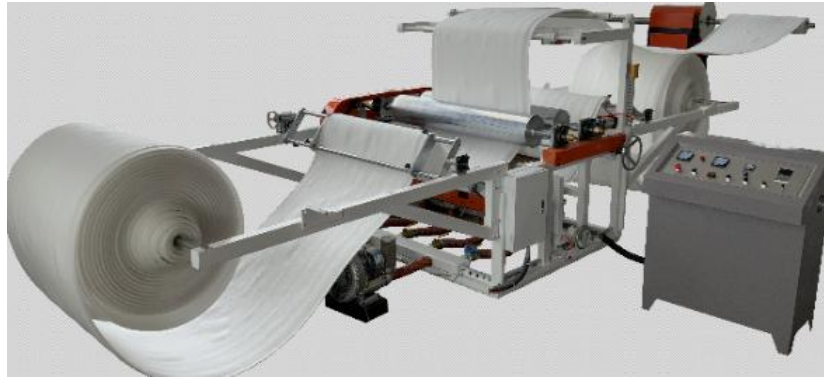

Butane: 150kg-250kg/T

# Bonding Machine

It's to bond one layer of epe foam sheet to another layer.  
Such as: 5mm plus 5mm to 10mm

# EPE Foam Air-exhaust Machine

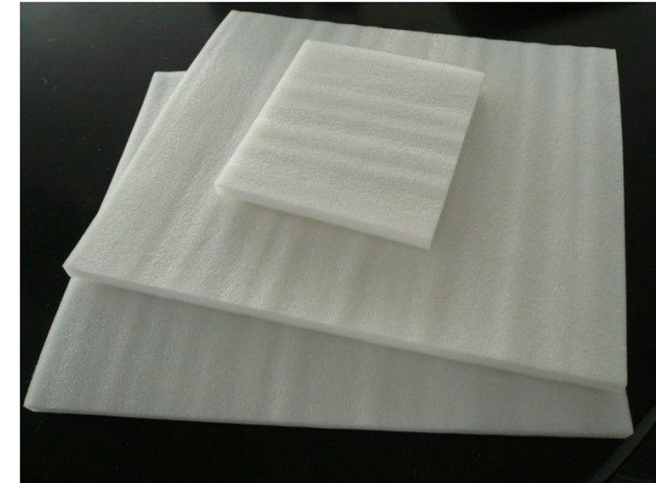

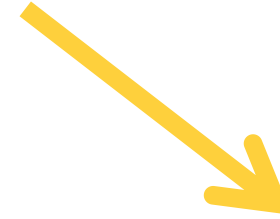

Save the butane gas volatilization time in the EPE Foam, which is convenient for warehouse operation

# Auto Cutting Machine

It's mainly used for cutting the large board of EPE Foam into the required size.

# EPE Foam Recycling Machine

In the production, EPE foam extrusion machine, bonding machine and cutting machine will produce a little waste materials, which can be heated, granulated, cooled, and diced by EPE Foam Recycling Machine, then put into the production again.
